**Holt construction repowers for Cat 769 Haul truck installation**  
**Subject: Non-feasible installation**

Dear Rob,

After giving thorough consideration to the matter, our team of HUSS Engineers and InstallationTechnicians have come to the conclusion that it is currently not feasible to install HUSS DPF devices on the following machine:

Cat 769 Haul truck

The primary issues with the installation include lack of sufficient room for mounting the filter systems which could lead to sufficient operator distraction, block access to the cab, reduce right corner driver visibility, and would require relocation of the engine air filters and brake reservoir.

Please feel free to contact us should you have any additional questions on this matter.

Thank you for your interest in HUSS products!

Sincerely,  
Huss, LLC
